

## Allocated gas gates (as at 30/10/2009)

The gas gates contained in the table below are gas gates that are allocated in accordance with the Gas (Downstream Reconciliation) Rules 2008 ("the Rules"), as from 1 October 2008.

A number of points should be noted, including:

- Gas Industry Co has determined the following grouped gas gates/notional delivery points for the purposes of the Rules. For completeness, these proposed grouped gas gates/notional delivery points are noted in the table:
  - **Greater Auckland (GTA03610)**: comprising Bruce McClaren (BMC17901), Henderson (HEN74101), Papakura (PAP06610) and Westfield (WST03610);
  - **Greater Hamilton (GTH11301)**: comprising Hamilton Te Kowhai (HTK08301) and Hamilton Temple View (HTV11301);
  - **Greater Kihikihi (GTK19101)**: comprising Kihikihi (KIH19101) and Te Awamutu North (TAW31004);
  - **Greater Mt Maunganui (GMM08001)**: comprising Mt Maunganui (MMU08001) and Papamoa (PPA33201);
  - **Greater Tauranga (GTT07701)**: comprising Pyes Pa (PYE36601) and Tauranga (TRG07701);
  - **Greater Waitangirua (GTW06910)**: comprising Waitangirua (WTG06910) and Pauatahanui 1 (PAH23201); and
  - **Greater Waitoki (GTW33901)**: comprising Waitoki (WTK33901) and Waitoki B (WTK33902).
- Te Awamutu North (TAW31004) is not listed as a separate gas gate on OATIS. It is not listed in the transmission pricing schedule. No shipper may reserve capacity at it. This gas gate is used to "top up" the Te Awamutu distribution network from time to time. Vector includes the metered injection quantities for TAW31004 in the metered injection quantities for Kihikihi (KIH19101).
- Waitoki B (WTK33902) is not a welded point on the Vector transmission system. It is an embedded gas gate supplied via the Waitoki (WTK33901) gas gate. The 'Greater Waitoki' grouped gas gate/notional delivery point (GTW33901) has been created solely for the purposes of enabling downstream allocation and

reconciliation of WTK33901 and WTK33902 (retailers are permitted to submit consumption information against WTK33902). At the upstream level GTW33901 is the same as WTK33901 (GTW33901 allocation results will be loaded into OATIS against the WTK33901 welded point ID).

- Please also note that the list of gas gate codes in the registry was updated at go-live for the Gas (Switching Arrangements) Rules 2008 and should now correspond to this list of gas gates. This list also matches the gas gate codes listed as Attachment 1 in version 1.2 of the *Determinations by the Industry Body (Gas Industry Co) under the Gas (Switching Arrangements) Rules 2008*.<sup>1</sup>

<sup>1</sup> Note however that "Flat Bush (Nova)" is used here as the gas gate name for FLB15601, instead of "Flat Bush".
